H-Screen 911L

Captures an A3 Image With a 12-Megapixels Lens

Easy to capture an image in A3 size with a 12-megapixels and wide-angle lens.

A3
12MP

Barcode Recognition

Capable to recognize 1D barcodes and to use them as file names.
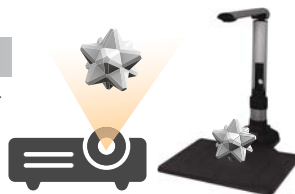

7 806723 188635

7806723188635

Video Recording

Capable to record video films.

Display of Real-time Videos

It can be connected with a projector to display a real-time video.

Fast-to-install Software and Easy-to-use Interface

The installment process for the software is easy and fast. Besides, the software interface can be accessed easily at a glance. Many functions, such as image shooting, image processing and document management, can be performed precisely based on users' preferences.

Timed and Smart Continuous Shooting

Timed Continuous Shooting
Under a setup of same parameters, users can set up a regular time interval to capture documents sequentially, saving working time efficiently.

Smart Continuous Shooting
Under a setup of same parameters, the system can capture many documents automatically based on changing of images, saving working time efficiently.
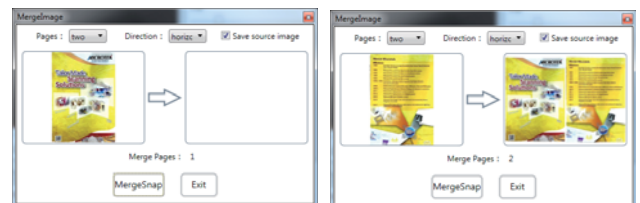

Multiple PDFs
The system can combine all continuously shooting images into a PDF file.

Image Merging

By predefined settings, users can merge images according to page numbers and image directions. If the "Save source image" option is checked, each image used in image merging will be saved and listed under a table.
