

The Smart Manufacturing Quality Choice

Textile Defect Inspection Solution

With Microtek's "Textile Defect Inspection Equipment," you can efficiently identify defects in woven fabrics, significantly reducing the costs associated with manual visual checks, misjudgments, and low efficiency issues. This results in an enhancement of manufacturing productivity and product quality. Additionally, the competitive pricing of Microtek's "Textile Defect Inspection Equipment" positions it as an unrivaled choice.

Textile Defect Inspection Equipment

Smart manufacturing solution

High value / Low cost / Labor saving

Non-contact image capture

Defect anomaly monitoring and intelligent control

Suitable for all types of conveyor belts

Suitable for various defect detection

Reduce costs
