# Scan-H880

Fingerprint Lifter Scanner
### On-site and Instant Image Capturing

- Portable scanner designed for capturing images of fingerprints or palm prints on black gellifters
- 500-dpi optical resolution generates the image that meets Level 2 detail of fingerprint
- Adopted with multi-angles LED light sources, ensuring superior image quality and guaranteeing more convenient in use than cameras
- Scanning gellifter of up to 118 x 165 mm in size
- A full-area scan takes only 12 seconds
- Captured image comes with reference scales, and it is mirrored and color inverted automatically
- Exclusive gellifter holder makes the gellifter loading and use easy
- With an optional tablet, the scanner can be integrated as a fully portable imaging system
- Comes with an exclusively-designed rucksack for easy to carry

Scan-H880

Scan, Frame to Select, Save and Review in Easy and Convenient Ways

Microtek's Scan-H880 is a new and advanced lifter capturing system which is exclusively designed and developed for record fingerprints and palm prints on black gellifters. It is equipped with long-life LED and linear CCD. Using it together with software which can capture images rapidly and is adopted with selectable angles for projected light and adjustable exposure time, uses can get better images. Scan-H880, with an easy-to-carry size, can be used together with a tablet and portable charger conveniently, allowing users to capture fingerprints and palm prints on-site and thus enhancing work efficiency.

Dedicated MiFP Capturing Software

- Easy to learn and operate user interface
- Captured image comes with reference scales
- Automatically mirror and invert the captured images
- Each fingerprint can be cropped and saved separately into database
- Selectable angles for projected light and adjustable exposure time
- Up to four customized scan settings for future use

Specifications

Image Sensor Type	Line CCD	File Format	JPEG / TIF / BMP
